

CLAIMS

The reference numerals in the claims are not intended to limit the protection sought or granted

1. An information display arrangement comprising a plurality of pockets (10), each pocket having a front panel (14) and a back panel (16), at least one edge (22) of each pocket being open so that a piece (26, 44) of writing material can be inserted into that pocket, each front panel being sufficiently transparent to enable such a piece of writing material in the respective pocket
5 to be seen through the front panel from the outside, the pockets being held edge-to-edge in a strip in such a way that one or more of the pockets can be readily separated from the remainder of the strip, and the back of the strip being self-adhesive (at 30; 46) to enable the pocket(s) separated from the strip to be adhered to a surface (38).
2. An information display arrangement as claimed in claim 1, wherein the pockets are
10 integrally formed with each other in the strip with means defining lines (28; 42) between adjacent pockets along which those adjacent pockets can be readily separated. (Figs. 2 & 3)
3. An information display arrangement as claimed in claim 2, wherein the back panels are integrally formed and are sufficiently brittle that they can readily be snapped apart along the separation lines. (Fig. 2)
- 15 4. An information display arrangement as claimed in claim 2, wherein the strip is flexible and is readily tearable along the separation lines. (Fig. 3)
5. An information display arrangement as claimed in any of claims 2 to 4, and further including a continuous backing layer (32) covering the self-adhesive back of the strip, the backing layer being tearable along the separation lines and being peelable from the separated
20 pocket(s) to expose the self-adhesive back(s) of the separated pocket(s). (Fig. 2)
6. An information display arrangement as claimed in any of claims 2 to 4, and further including a series of backing pieces (44) each covering the self-adhesive back of a respective one of the pockets, each backing piece being peelable from the respective pocket to expose the self-adhesive back of the respective pocket. (Fig. 3)
- 25 7. An information display arrangement as claimed in claim 6, wherein each backing piece is a piece of writing material of a size such that it can be inserted into the respective pocket.

8. An information display arrangement as claimed in claim 1, wherein the pockets are separately formed and the arrangement further includes a continuous backing layer (32) to which the pockets are adhered edge-to-edge by their self-adhesive backs, each pocket being peelable from the backing layer to expose the self-adhesive back of that pocket. (*Fig. 4*)
- 5 9. An information display arrangement as claimed in claim 8, wherein the backing layer is tearable between adjacent pockets and is foldable.
10. An information display arrangement as claimed in any preceding claim, wherein the pockets are each generally rectangular and are arranged longer-edge to longer-edge in the strip.
- 10 11. An information display arrangement as claimed in any preceding claim, wherein the pockets are each generally rectangular with one of their shorter edges open.
12. An information display arrangement as claimed in any preceding claim, and further including a further such strip (52) held together with and readily separable from the first-mentioned strip (50). (*Fig. 6*)
- 15 13. An information display arrangement as claimed in any preceding claim, in combination with a plurality of pieces (26;44) of writing material, or a sheet (34) that can readily be divided up into a plurality of pieces of writing material, each of which can be written on and inserted into one of the pockets.
